IN MEMORIAM

The World Dictionary of Trees community would like to pay *In Memoriam* tribute to its author, Professor Miroslav M. Grandtner, 1928-2013.

Professor Grandtner was born in Slovakia (1928), did his PhD Studies in Leuven University, Belgium (1962) and became faculty member (1958) at Laval University in Québec City, Canada. He has led a brillant career in research and teaching both in Canada and around the world. His pioneering studies about the ecology and cartography of forests of the province of Québec, Canada became an invaluable scientific tool to enhance sustainable development and inform the creation of national forest management policies in North America, Africa and Asia. The second part of his research career was devoted to further the phytosociological discipline to an unprecedented level. He then renewed himself again to lead interdisciplinary scientific research in cyto-genetics as the fondation of the cration of new bioindicators of climate change.

Through over fifty years of an impressive scientific career, Professor Grandtner was able to take action in relation to his deep belief in the importance of scientific dissemination. Be it through teaching, taking active part in socio-economical development projects or through creating innovative interpretation strategies, his actions were beneficial to many and, among others, to the Canadian national parks network. His personal and professional impact on his students were highly recognized as those students became the core of governemental research expertise in modern Québec as well as have had prime influence on the transformation of the forestery industry. For more than half of a century, he has been an inspiration to many students, collegues and friends and this has led to refer to his intellectual, personal and organisational legacy as *The Grandtner School.*

In 1989, Professor Grandtner created the first Canadian program of International Forestry to the credit of Laval University and travelled the world extensively for more than fifteen years. His extended experience of field trips coupled with the development of innovative pedagogies has underlined the lack of sound pedagogical tool to support this endeavour. He then envisioned a new body of knowledge related to terminological, ecological and commercial information about trees that would, in his view, become an invaluable asset in informing and fostering action in biodiversity conservation and sound eco-systems management as well as supporting sustainable development.

The World Dictionary of Trees birthed in that context. This “retirement project” was, in his own words, “what I like to do best: to study trees and share with the world.” He gathered a network of collaborators and contributors as well as a team of researchers who were, for more than twenty years, his faithful companions on the progression path of the Dictionary.

Those companions alongside countless collaborators and friends are gathering through this note to give heartfelt kudos to Miroslav Grandtner’s vision that thread through his life and work. We all want to praise his innovative spirit, tremendous resilience and scientific rigour but above all, his genuine elegance in ideas, values and humanity.

Merci Miroslav Grandtner et bon voyage!

ACKNOWLEDGMENTS

As this dictionary is a compilation, we gratefully acknowledge the authors whose names appear in the list of references. In addition, we express special appreciation to Elbert L. Little Jr†, Jean-Paul Lanly and Guoying Xu for guiding and critiquing during the preliminary discussions, to all collaborators and reviewers, to Elbert L. Little Jr†, Norman Dignard, Louis Parrot, Pierre Bellefleur, Yves Aubry, Serge Audet, Damase P. Khasa, Régent Gravel, Tecsult Inc., Conservatoire & Jardin botaniques de la Ville de Genève and Herbier Louis-Marie for helping us with floras, to Brenda J. McAfee, Camille Gervais†, Alexandre Strachan† and Sandra Szczygiel for checking the English text, to Louise Marcoux for drawing the map of South America, to Nancy Maragioglio, Carrie Bolger, Kristi Gomez and Pat Gonzalez from Elsevier in San Diego and Caroline Johnson from Elsevier in Oxford, UK for their kindness, patience and understanding.

HOW TO USE THIS BOOK

This dictionary attempts to present, in alphabetical order of the currently accepted Latin names, all known genera, species, subspecies and varieties of trees, excluding fossil and more recently extinct taxa, hybrids and cultivars. Separated indexes of Latin synonyms, English, French, Spanish, and other possible names and trade names are also provided. All taxa are numbered consecutively. This last number appears in all indexes permitting rapid and easy cross-referencing.

For example, suppose you know the Latin name of a tree *Araucaria araucana* and you want to know more about it; just look at the basic table in alphabetical order and you will find it at number 883 with the countries where it grows, its height, its uses and so on. But suppose you were looking for *Araucaria imbricata* and you will not have find it; at that moment, you have to consult the alphabetical Latin synonyms index and you find it with the number 883 corresponding to *Araucaria araucana* in the basic table. If you are looking for a large ornamental tree for your home and all you know is monkey-puzzle tree, the English name of that tree; just go to the English name index and you will find it with the number 883, then go back to the basic table and you will find *Araucaria araucana*. It is easy and complete for thousands of South American trees.

The definition of a tree follows essentially Little Jr (1979: 3). A tree is defined as a woody plant, with a single, erect and persistent stem of at least 10 cm in diameter, measured at 1.3 m above the mean ground level, and with a total height of at least 5 m. A crown of leaves may be more or less well defined. Willows (*Salix*), birches (*Betula*), palms (Palmae) and bamboos (*Bambusa*, *Guadua*), with several stems branching from the same root system, as well as cacti (Cactaceae) are considered as trees, provided that they meet the diameter and height criteria.

Only the indigenous trees of a continent, those wild species that were natural elements of the spontaneous forest vegetation before the arrival of Europeans or other colonizers are included.

Each generic entry includes the family, according to Mabberley (2008), to which the genus is assigned, the synonyms of Latin name, and English, French, Spanish, trade and other names. For English and French names, the standard name is listed first, followed, in alphabetical order, by additional available names, transcribed such as they were found in literature, with the country where they are used in parentheses. Where the names in other languages are listed, the parentheses indicate the language and the country where they are used.

Each infrageneric (species, subspecies, variety) entry includes, in addition, the distribution, height, type of foliage, ecological characteristics and main uses of the tree when available. Please note that the content of the section *dr* is for informational purposes only. The authors are not liable in any way for the results of medicinal uses mentioned in this book. The reader assumes any and all risk of damage, injury, death, or any other inconvenient related to the content found herein. All data are valid till December 31, 2008.

Abbreviations for authors' names follow The International Plant Names Index (online).

In this second volume, only taxa native to the South American continent are included. South America is comprised in the global geographical and not political sense. That means bounded by Panama and the Carribean Sea to the North, including Aruba, Curaçao, Bonaire and Trinidad and Tobago, by the Atlantic Ocean to the East, including the Falkland Islands and by the Pacific Ocean to the West including Islas Juan Fernández but excluding the Galápagos Islands. The Drake passage separates South America from Antarctica. It is divided into nine zones.

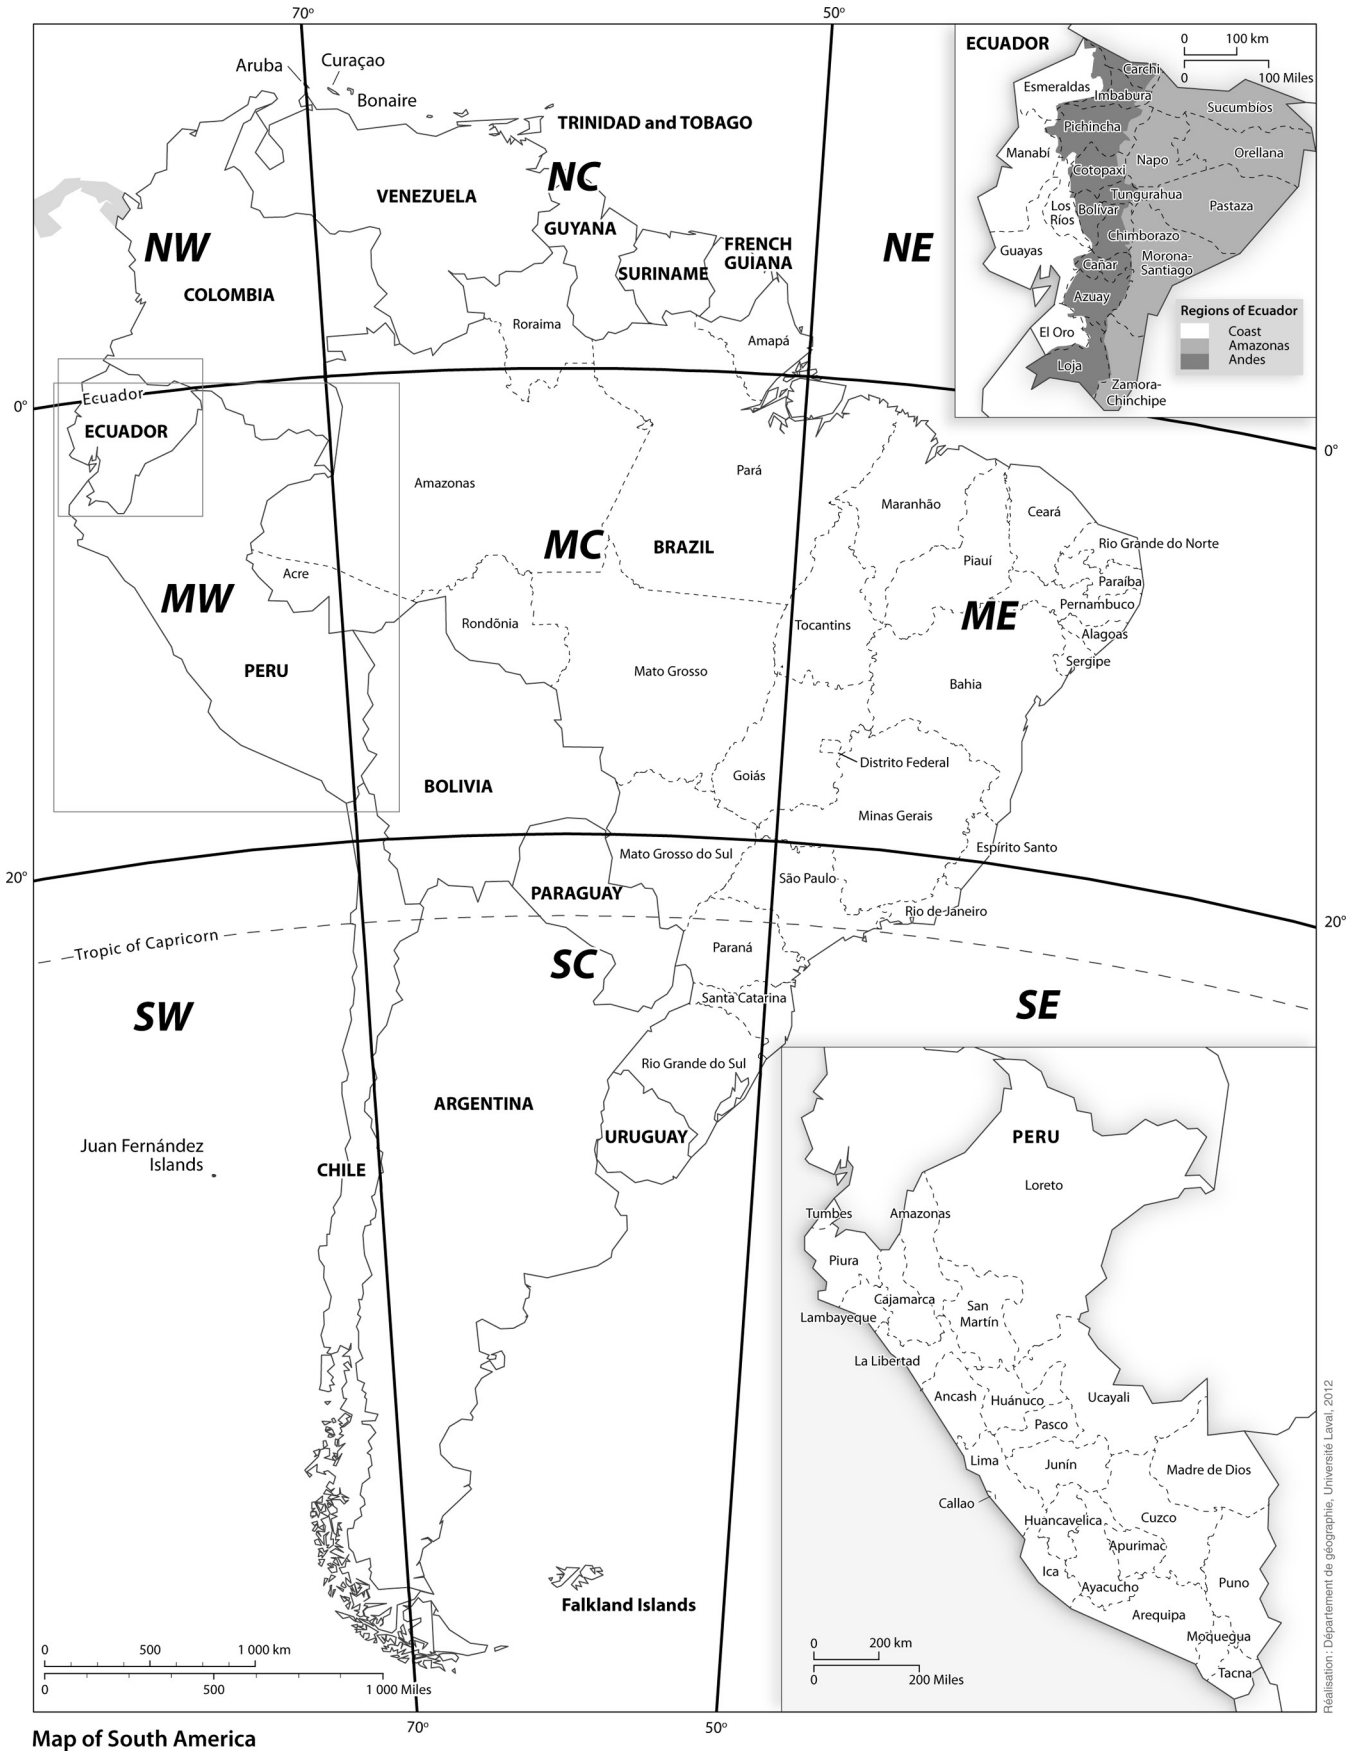
For users unfamiliar with the condensed style of dictionaries such as this, the following generic and specific name entries are set out *in extenso* as examples to aid comprehension.

881 Araucaria Juss.

Araucariaceae

e araucaria

f araucaria



Map of South America

s araucaria (Chile, Peru)

o araucaria (italian); Araukarie (german)

Taxon number 881, genus *Araucaria*, described by Antoine Laurent de Jussieu (1748–1836). Family Araucariaceae. English name: araucaria. French name: araucaria. Spanish name: araucaria. Other names: araucaria is an Italian name and Araukarie is a German name.

883 Araucaria araucana (Molina) K. Koch

Araucariaceae

SW South America (S Chile, S Argentina) int North America (USA, Panama) MW Eurasia, SC Africa

L E sci->hel hyg xer *cl* (national tree of Chile) *dr* (bark: resin) *ex* (endangered) *fd* (seeds) *fr* (seeds) *pl* (ornamental, parks, public squares) *pp* (pulp and paper) *ti* (coach-building, cooperage, flooring, panels, posts, shipbuilding, veneer)

Abies araucana (Molina) Poir.

Araucaria chilensis Mirb.

Araucaria dombeyi A. Rich.

Araucaria imbricata Pav.

Columbea quadrifaria Salisb.

Dombeyana chilensis Lam.

Pinus araucana Molina

e monkeypuzzle araucaria; Chilean pine, Chile pine, Chile pine–monkey puzzle (UK); monkey puzzle, monkey-puzzle, monkeypuzzle, monkey-puzzle tree (North America)

f araucaria du Chili; araucaria à feuilles imbriquées, désespoir du singe, pin du Chili

s araucaria (Chile, Peru); araucaria chilena (Venezuela); araucaria de Neuquén (Peru); pehuen (Chile, Peru); pehun (Argentina, Chile); pewen, pilon, pino araucaria (Chile); pino de Neuquén (Argentina); piñonero (Chile); piñones (Argentina, Chile)

o araucaria del Cile (italian); Chilenische Araukarie (german); pino del Cile (italian)

Taxon number 883, *Araucaria araucana*, species described by Karl Heinrich Koch (1809–1879) in its present form; however, epithet *araucana* was used before by Juan Ignacio Molina (1737–1829) with the genus *Pinus* for *P. araucana* Molina. Family: Araucariaceae. Naturally distributed as native species in Southwest South America, more specifically in South Chile and South Argentina and introduced in North America, particularly in the USA and Panama, and in Middlewest Eurasia and Southcenter Africa. Large tree (from 20,1m to 60 m) with evergreen foliage, sciaphilous (shade tolerant) to heliophilous (adapted to full sunlight) species. Growing well in wet (hygrophilous) or dry (xerophilous) sites. It is the national tree of Chile. The resin of the

bark is used in medicine and this is an endangered species. The seeds are edible and are also used as fodder for animals. This is an ornamental tree planted in parks and public squares. It also serves for pulp and paper purposes. Its timber serves for coachbuilding, cooperage, flooring, panels, posts, shipbuilding and veneer. Synonyms: *A. araucana* described by Jean Louis Marie Poiret (1755–1834), *Araucaria chilensis* described by Charles François Brisseau de Mirbel (1776–1854), *Araucaria dombeyi* described by Achille Richard (1794–1852), *Araucaria imbricata* described by José Antonio Pavón (1754–1844), *C. quadrifaria* described by Richard Anthony Salisbury (1761–1829), *D. chilensis* described by Jean Baptiste Antoine Pierre de Monnet de Lamarck (1744–1829) and *P. araucana* described by Juan Ignacio Molina (1737–1829).

English names: monkeypuzzle araucaria is the standard name; the remaining are the other common names of which Chile pine–monkey puzzle is used in the United Kingdom. French names: araucaria du Chili is the standard name; the remaining are the other common names. Spanish names: There is no proposed standard name; there are just common names. Other names: there is no proposed standard name, araucaria del Cile and pino del Cile are Italian names and Chilenische Araukarie is a German name. No trade name is known for this species.

Brosimum longifolium Ducke
e longleaf cow breadnuttree
f brosimum utile à feuilles longues
s chingonga (Peru); marima (Venezuela)
o amapá-mururé (portuguese, Brazil)

1563 Brosimum utile subsp. **magdalenense** C.C.Berg
Moraceae NW South America (Colombia) L *fr* (fruits: parrots)
e RíoMagdalena cow breadnuttree
f brosimum utile du Río Magdalena
s manta (Colombia)

1564 Brosimum utile subsp. **occidentale** C.C.Berg
Moraceae NW MW South America (Colombia, Ecuador: Esmeraldas, Carchi, Pichincha; Peru) L
e western cow breadnuttree
f brosimum utile occidental
s lechero (Colombia); sande (Colombia, Ecuador); sandre (Colombia)
o jo-chi (chachi, Ecuador); ju'chi, ju'chi sande (Ecuador)

1565 Brosimum utile subsp. **ovatifolium** (Ducke) C.C.Berg
Moraceae N MW MC South America (Colombia, Venezuela, Guianas, Ecuador: Sucumbíos, Napo; Peru, Brazil: Amazonas, Pará, Mato Grosso; Bolivia) L hyg mes *cl* (bark: ceremonial head bands) *ma* (bark: bow strings, carrying head bands, dancing shirts) *pp ti* (hard; boxes, construction)
Brosimum krukovii Standl.
Brosimum ovatifolium Ducke
Brosimum pallescens Ducke
Brosimum rigidum Ducke
e ovateleaf cow breadnuttree
f brosimum utile à feuilles ovées
s arbol vaca (Colombia); frutepan de monte (Ecuador); leche caspi (Peru); lechero (Colombia, Ecuador); marima, marina (Venezuela); mui (Colombia, Ecuador); palo de vaca (Venezuela); pan de árbol (Colombia); panguana (Peru); pio (Bolivia); sacha tulpay (Peru); sande, sande negro (Colombia, Ecuador); saude, vaco (Colombia)
o amapadoco, anapa (portuguese, Brazil); bown-teg (yakup, Colombia); dayacabi (baré, Venezuela); leiteira (portuguese, Brazil); ma-reé-ma (yucuna, Colombia); sande huiqui (Ecuador); takina (aukaans, Suriname); turury (portuguese, Brazil); ulukupi, ulukupisi li (wayampi); wa-só-gu (makuna, Colombia); we weime (wayana)
t sande

1566 Brosimum utile (Kunth) Oken ex J.Presl subsp. **utile**
Moraceae SE North America (Panama) N South America (Colombia, Venezuela) L *fd* (latex: chewing gum)
e typical cow breadnuttree
f brosimum utile typique
s palo de vaca (Colombia, Venezuela); zarzaparilla (Colombia)
o margis, marquis (kuna, Panama)

1567 Brownea Jacq.
Leguminosae
Hermesias Loefl.
e flamebean; brownea
f brownéa
o brownea (italian); Brownea (german)

1568 Brownea ariza Benth.
Leguminosae N MW South America (Colombia, Venezuela, Ecuador: Sucumbíos, Napo) M hel hyg *dr* (flowers: in emetic homeostat teas for excessive menstruation; leaves) *fd* (leaves: tea) *pl* (ornamental) *sa* (shade) *ti* (Loreto's finest wood; canes, parquets, posts, rulers, small objects)
Hermesias ariza (Benth.) Kuntze
e ariza flamebean; wild rose
f brownéa ariza
s amapolo (Colombia); arizá; cruz caspi (Ecuador); palo cruz (Colombia, Peru); palo de cruz, palo rosa (Colombia); rosa del monte, tsanda mapicho (Ecuador)

1569 Brownea birschellii Hook.f.
Leguminosae N South America (Colombia, Venezuela) M
e Birschell flamebean
f brownéa de Birschell

1570 Brownea bolivarensis Pittier
Leguminosae NW South America (Colombia) S?
e Bolívar flamebean
f brownéa de Bolívar

1571 Brownea coccinea Jacq.
Leguminosae N MW South America (Colombia, Venezuela, Trinidad and Tobago, Guyana, Ecuador: Coast, Orellana; Brazil: Roraima) int SC Eurasia M [L] hyg *fr* (fruits: game wild animals) *fw* (firewood) *ti* (beams)
Hermesia coccinea (Jacq.) Kuntze
e scarlet flamebean; brownea
f brownéa écarlate
s rosa de la montaña (El Salvador)
o urcu yutsu (quichua, Ecuador)

1572 Brownea coccinea subsp. **angustiflora** (Little) Klitg.
Leguminosae NW MW South America (Colombia, Guyana, Ecuador: Coast) M [L] sci hyg *ti* (good)
Brownea angustiflora Little
e narrowflower scarlet flamebean
f brownéa écarlate à fleurs étroites

1573 Brownea coccinea subsp. **capitella** (Jacq.) D.Velazquez & G.Agostini
Leguminosae N MC South America (Colombia, Venezuela, Trinidad and Tobago, Guyana, Brazil: Roraima) S? E sci hyg
Brownea capitella Jacq.
Brownea latifolia Jacq.
Brownea racemosa Jacq.
Hermesias capitella (Jacq.) Kuntze
Hermesias latifolia (Jacq.) Kuntze
Hermesias racemosa (Jacq.) Kuntze
e orange scarlet flamebean; broadleaf flamebean; cooperhoop, mountain rose (Trinidad and Tobago)
f brownéa écarlate orangé

1574 Brownea coccinea Jacq. subsp. **coccinea**
Leguminosae N MW South America (Colombia, Venezuela, Ecuador: Cotopaxi, Pastaza) M hyg
Brownea aroensis Pittier
Brownea guaraba Pittier
Brownea guaramaco Pittier
Brownea longiflora Pittier
Brownea speciosa Rchb. ex DC.
Brownea superba Pittier
Hermesias speciosa (Rchb. ex DC.) Kuntze
e typical scarlet flamebean
f brownéa écarlate typique
s clavellíno (Ecuador)

Leguminosae N MW South America (Colombia, Venezuela, Trinidad, Ecuador: Los Ríos, Amazonas; Peru) int SE North America (Greater Antilles) and SC Eurasia (Myanmar) S [M] E hyg→mes *dr* (bark: antihemmorhagic; flowers: infusion to regulate menstruation; flowers and leaves: contraceptive) *fw* (fuel) *pl* (cultivated) *ti* (construction, handicrafts, posts)
Brownea amphibracteata Pittier
Brownea araguensis Pittier
Brownea loretensis Standl.
Hermesias grandiceps (Jacq.) Kuntze
e glory flamebean; rose of Venezuela
f brownéa éclatant; rose du Venezuela
s correa (Ecuador); palo cruz (Peru); palo de cruz (Ecuador); rosa de montaña (Venezuela); rosa de monte (Cuba); rosa de Venezuela (Venezuela)
o añabëma (siona, Ecuador); braúnia (portuguese, Brazil); condor caspi, cruz caspi (quichua, Ecuador); garetague, garetohue, oyokabe (waorani, Ecuador); rosa-da-mata, rosa-da-montanha, rosa-da-serra (portuguese, Brazil); Rose von Venezuela (german); sol-da-Bolivia; taung-america-thawka (Myanmar)

1576 Brownea leucantha Jacq.
Leguminosae SE North America (Panama) NC MW South America (Venezuela, Peru) L hyg *dr* (bark and flowers: febrifuge decoction) *ti* (very hard)
Hermesias leucantha (Jacq.) Kuntze
e whiteflower flamebean
f brownéa à fleurs blanches
s palo de cruz, rosa blanca, rosa blanca de monte, rosa de cruz, rosa de montaña (Venezuela)

1577 Brownea longipedicellata Huber
Leguminosae N MC South America (Colombia, Venezuela, Brazil: Amazonas) S?
e longpedicel flamebean
f brownéa à longs pédicelles
s rosa de montaña (Venezuela)

1578 Brownea macrophylla Linden
Leguminosae SE North America (Panama) N MW South America (Colombia, Venezuela, Ecuador: Amazonas; Peru) M [L] hyg *dr* (against blood disorders) *pl*
e great flamebean
f brownéa à grandes feuilles
s cacao silvestre (Peru); cacique negro (Panama); cruz caspi (Ecuador); rosa de la montaña gigante (El Salvador); rosa de monte (Venezuela)
o Grossblättriger Nadelkissenbaum (german)

1579 Brownea multijuga Britton & Killip
Leguminosae SE North America (Panama) NW MW South America (Colombia, Ecuador: Coast, Amazonas; Peru) L *dr* (bark: antihemorrhagic) *fw* (firewood) *sa* (cacao shade) *ti* (very hard; construction, furniture)
Brownea herthae Harms
e manyyoked flamebean
f brownéa clavellín
s aloche (Ecuador); clavellín (Colombia, Ecuador); clavellíno, flor de mayo, mayo (Ecuador); rosa de monte (Panama)

1580 Brownea negrensis Benth.
Leguminosae NW ME South America (Colombia, Ecuador: Napo; Brazil: Bahia) S? *dr* (seeds: aphrodisiac; infusion: help to regulate menstruation)
Hermesias negrensis (Benth.) Taub.
e Brazil flamebean
f brownéa du Brésil
s palo de cruz, palo santo (Colombia)

1581 Brownea rosa-de-monte P.J.Bergius
Leguminosae SE North America (Panama) N South America (Colombia, Trinidad) M
Brownea antioquiensis Linden
Brownea ariza Lindl. ex Paxton non Benth.
Brownea coccinea Loefl. ex Griseb. non Jacq.
Brownea princeps Linden ex Otto
Brownea rosa Pers.
Brownea rosa-montis Pittier

Brownea rosea Otto
Hermesias rosa (P.J.Bergius) Kuntze
e mountainrose flamebean; cooper hoop (Trinidad)
f brownéa rose-de-montagne

1582 Brownea similis R.S.Cowan
Leguminosae N MW South America (Colombia, Venezuela, Ecuador) M
Brownea caurensis Pittier
Brownea caurensis var. *major* Pittier
e similar flamebean
f brownéa similaire

1583 Brownea stenantha Britton & Killip
Leguminosae NW South America (Colombia) M
e narrowflower flamebean
f brownéa à fleurs étroites
s arizá, palo cruz (Colombia)

1584 Brownea tillettiana D.Velásquez & G.Agostini
Leguminosae NW South America (Venezuela) S? sci *sa* (coffee shade)
e Tillett flamebean
f brownéa de Tillett

1585 Browneopsis Huber
Leguminosae
e falseflamebean
f faux-brownéa

1586 Browneopsis cauliflora (Poepp.) Huber
Leguminosae MW South America (Peru) M
Brownea cauliflora Poepp.
Hermesias cauliflora (Poepp.) Kuntze
e cauliflorous falseflamebean
f faux-brownéa cauliflore

1587 Browneopsis disepala (Little) Klitg.
Leguminosae NW MW South America (Ecuador: Coast; Peru) L *ex* (endangered)
Brownea disepala Little
e twosepal falseflamebean
f faux-brownéa bisépale
s palo de vaina, tamarindo de monte (Ecuador)

1588 Browneopsis excelsa Pittier
Leguminosae SE North America (Panama) NW MW South America (Colombia, Peru, Brazil: Acre) L hyg *fr* (fruits) *ti* (hard; construction)
Brownea excelsa (Pittier) J.F.Macbr.
e lofty falseflamebean
f faux-brownéa élevé
s ariza, cacique negro, cativo, cuchillito, palo de la cruz, rosa del monte (Panama)
o muricí (portuguese, Brazil)

1589 Browneopsis macrofoliolata Klitg.
Leguminosae MW South America (end Ecuador: Pichincha, Los Ríos) M *ex* (critically endangered)
e largeleaflet falseflamebean
f faux-brownéa à grandes folioles

1590 Browneopsis peruviana (J.F.Macbr.) Klitg.
Leguminosae MW South America (Peru, Brazil: Acre) S? *ex* (critically endangered)
Brownea peruviana J.F.Macbr.
e Peru falseflamebean
f faux-brownéa du Pérou

1591 Browneopsis ucayalina Huber
Leguminosae NW MW South America (Ecuador: Coast, Amazonas; Peru) L *dr* (bark: decoction against cysts, headache, rheumatism and toothache)
Brownea ucayalina (Huber) Ducke
e RíoUcayali falseflamebean
f faux-brownéa du Río Ucayali
s arbol de condor (Ecuador)
o condor caspi, cruz caspi, curus caspi (quichua, Ecuador)

1592 Browningia Britton & Rose
Cactaceae
Gymnanthocereus Backeb.
e browningia
f browningia

1593 Browningia albiceps F.Ritter
Cactaceae MW South America (end Peru: Cajamarca) S? xer *ex* (trade controlled)
e Cajamarca browningia
f browningia du Cajamarca

1594 Browningia altissima (F.Ritter) Buxb.
Cactaceae MW South America (end Peru: Amazonas, Cajamarca) S? *ex* (trade controlled)
Gymnanthocereus altissimus F.Ritter
Gymnocereus altissima (F.Ritter) Backeb.
e Peru browningia
f browningia du Pérou

1595 Browningia amstutziae (Rauh & Backeb.) Hutch. ex Krainz
Cactaceae MW South America (end Peru: Pasco) S?
Gymnocereus amstutziae Rauh & Backeb.
e Amstutz browningia
f browningia d'Amstutz

1596 Browningia caineana (Cárdenas) D.R.Hunt
Cactaceae MC SC South America (Bolivia, Paraguay) S *ex* (trade controlled) *fr* (fruits: tapir)
Castellanosia caineana Cárdenas
e RíoCaine browningia
f browningia du Río Caine
s el carapari (Bolivia)
o tásak (chorote, Paraguay)

1597 Browningia candelaris (Meyen) Britton & Rose
Cactaceae MW SC South America (Peru, N Chile) S xer *ex* (endangered, trade controlled) *fw* (firewood) *fr* (branches: livestock) *ti* (framing, furniture)
Browningia candelaris subsp. *icaensis* (F.Ritter) D.R.Hunt
Browningia icaensis F.Ritter
Cactus candelaris (Meyen) Meyen
Cereus candelaris Meyen
e candlestick browningia
f browningia candélabre
s cacto candelabro (Chile); candelabro, gigantón; quisco candelabro (Chile)
o shikullu, chuyachaqui (quichua)

1598 Browningia columnaris F.Ritter
Cactaceae MW South America (end Peru: Ayacucho) S? xer *ex* (trade controlled)
e columnar browningia
f browningia en colonnes

1599 Browningia hertlingiana (Rauh) Buxb.
Cactaceae MW South America (end Peru: Ayacucho, Apurimac, Huancavelica) S xer *ex* (trade controlled)
Azureocereus ayacuchensis H.Johnson
Azureocereus ciliisquamus F.Ritter
Azureocereus hertlingianus (Backeb.) Rauh
Azureocereus imperator H.Johnson
Azureocereus nobilis Akers
Azureocereus viridis Rauh & Backeb.
Browningia viridis (Rauh & Backeb.)
Clistanthocereus hertlingianus Backeb.
e Ayacucho browningia
f browningia d'Ayacucho
s giganton (Peru)

1600 Browningia microsperma (Werderm. & Backeb.) W.T.Marshall
Cactaceae MW South America (Ecuador: Loja; Peru) M xer *ex* (trade controlled)
Cereus microspermus Werderm. & Backeb.
Gymnanthocereus microspermus (Werderm. & Backeb.) Backeb.
Gymnocereus microspermus (Werderm. & Backeb.) Backeb.
Jasminocereus microspermus (Werderm. & Backeb.) W.T.Marshall
Trichocereus microspermus (Werderm. & Backeb.) Werderm. & Backeb. ex Borg
e smallseed browningia
f browningia à petites graines

1601 Brugmansia Pers.
Solanaceae
Datura L.
e brugmansia; datura
